Rwby world of remnant between kingdoms

in: General, World of Remnant, Media Edit Comments Share Go beyond the story in this RWBY supplementary series, delve into the different forces that shape ... the resting world. Kerry ShawcrossMiles LunaMonty Oum August 21st, 2014-January 14th, 2017 RWBY: World of Remnant was an American mini-series created by Monty Oum and produced by Rooster Teeth Productions that documents various areas, creatures and objects in Remnant, the world in which RWBY is set. Summary [edit | edit source] World of Remnant episodes varied in length, but are on the whole much shorter than the average RWBY episode, at about 2-4 minutes in length. Individual episodes of the series provided information on specific topics in the RWBY universe, with narrative statement accompanied by illustrative visuals. The art style of World of Remnant is highly stylized and mostly reproduced in 2D compared to the 3D look of the main series. The episodes accompanying Volume 2 were narrated by Salem (at the time known as the mysterious Narrator). The episodes accompanying Volume 3 were narrated by Ozpin and those published in Volume 4 are narrated by Qrow Branwen. [1] Various characters from the main series also occasionally appeared as silhouettes in the videos. Release[edit | edit source] The first set of World of Remnant episodes was broadcast on an irregular release schedule simultaneously with RWBY Volume 2 original run. The World of Remnant episodes were broadcast during the main show's off-weeks when the main series did not have a new episode. These weeks followed the release of the episodes Painting the Town..., Dance Dance Infiltration and Mountain Glenn. Volume 2 ended with a total of four episodes, the last of which was exclusive to Volume 2 DVD and Blu-ray releases. [2] The fifth World of Remnant episode was released several weeks before the premiere of RWBY Volume 3. Just the same as the year before, subsequent episodes were broadcast after every third episode of RWBY. Meanwhile, Qrow and Ozpin nominate Pyrrha as candidates for their guardian. 346Fall18:20December 12, 2015 (2015-12-12) Pyrrha faces the decision to accept Fall Maiden's Aura and powers, a process that could fail or make her lose her identity. Meanwhile, the Vytal Festival Tournament proceeds to its singles match, with Yang and the Mercury struggling in the first round. Yang wins, but Emerald uses her hint of hallucinations to trick her into attacking a defenseless Mercury. The audience gets angry and Grimm outside Vale stir from the negative emotions. 357In the beginning of the end17:01January 2, 2016 (2016-01-02) In a series of flashbacks, Cinder recruits Emerald and Mercury. Later, they ambush Fall Maiden, Amber, using Emerald's Semblance to lure her in. Qrow intervenes, but Cinder is in stealing half her powers. With his new skills, Cinder forces the White Fang to cooperate. In the present, Emerald, Cinder and Neo Mercury fly out of the Amity Colosseum, revealing that Mercury was never injured by Yang's attack because of his prosthetic leg. 368Destiny17:38January 9, 2016 (2016-01-09) Yang is disqualified from the tournament, while Pyrrha remains in conflict over Ozpin's offer. Jaune inadvertently urges her to go through with becoming Fall Maiden, upsetting her. On the way to the arena, Ruby meets Velvet, who mentions that Coco had a hallucination similar to Yang when she fought emerald in the tournament. Ruby becomes suspicious when she sees Emerald in the stands, but before she can confront her, she meets Mercury. 379PVP12:28January 16, 2016 (2016-01-16) During Pyrrha and Penny's battle, Emerald uses its hint of Pyrrha, causing her to inadvertently trip Penny apart. Everyone is horrified, and Cinder uses its virus to take control of the public broadcasting system and blame every incident at Ozpin and Ironwood. The negative emotions of the people are amplified, causing hordes of Grimm to attack the Beacon Academy, Amity Colosseum and Vale. Neo breaks Torchwick out of prison and they gain control of Ironwood's flagship. Adam Taurus and The White Fang arrive in Beacon. 3810Battle of Beacon16:35January 30, 2016 (2016-01-30) As the Grimm attack continues, Ruby rallies the support of various student teams; They command a transport to fly back to Beacon and defend it. Torchwick uploads the Cinders virus on Ironwood's flagship, seizes control of Alesian android soldiers and causes Ironwood's transport to crash. A giant dragon Grimm jumps out of Mountain Glenn and flies towards beacon, spawning more Grimm on the battlefield. As Cinder has her staff emitting the destruction, she spots Ozpin, Pyrrha, and Jaune on her way to Fall Maiden's vault. 3911Heroes and Monsters17:21February 6, 2016 (2016-02-06) Ruby fights Neo and Torchwick after landing on the damaged flagship. Even if they overwhelm her, Ruby manages to knock Neo off while Torchwick is consumed by a Grimm. In Vale, Ironwood joins Qrow and Beacon's teachers against the corrupt androids and Grimm. At Beacon Academy, students fight against White Fang, Velvet and Weiss using their Semblances to take out White Fang's Paladins. Blake meets and fights Adam, but is injured. Adam declares that he will punish her creation by destroying everything she loves, just as Yang arrives and attacks. Adam severs Yang's right arm, but Blake manages to get her away to safety. In the box, Ozpin begins to transfer Amber's powers to Pyrrha, but Cinder kills Amber before the process is complete and steals her remaining powers. 4012End of the Beginning28:05February 13, 2016 (2016-02-13) After killing Ozpin, Cinder is challenged by Pyrrha; The dragon destroys the CCT tower as they fight. Ruby arrives in time to watch Cinder kill Pyrrha. release white light from her eyes that petres the dragon and partially Cinder. When Ruby wakes up at home, Qrow explains that her abilities come from a number of rare and powerful silver-eyed warriors like her mother. With the CCT tower destroyed, civilians have lost confidence in the realms, while Ruby's team has fallen apart; Blake has escaped, Weiss has been returned to Atlas by her father, and Yang is traumatized by her injury. As winter falls, Ruby, Jaune, Nora and Ren travel to the Garden, where Qrow suspects Cinder will attack next. The narrator reveals himself as Salem, the true brains behind the Fall of Beacon. In a post-credits scene, Qrow follows Ruby and her friends under the guise of a crow. Volume 4 (2016-17) Volume 4 was announced by Gray Haddock on 1. Upset by their continued failures, Ren gets into an argument with Yang and Jaune over their lack of preparedness as hunters. At night, they seek refuge at an outpost as Grimm emerges from a forming error. Meanwhile, Ruby's team hides on Schnee Manor, while Cinder secretly goes to Amity against Salem's orders for the Winter Maiden forces. 975Amity19:10December 5, 2020 (2020-12-05) Cinder, Neo, and Emerald infiltrate Amity Tower, but they are defeated by Penny and Maria. However, Amity is damaged and unable to reach the signal range. Despite Pietro's protestations, Penny moves it within reach and sends Ruby's video to the world. But Hacks into Penny via her sword and the signal, restart her system. When Winter and Ace-Ops are sent with Penny to the vault, he steals Ironwood's scroll. Meanwhile, Yang's group discovers that a river of Grimm is flowing towards Mantle. 986Midnight19:38December 12, 2020 (2020-12-12) Cinder dreams of her childhood, where she was adopted and worked as a slave for a hotelier in Atlas. Taking pity on her, Rhodes, a Huntsman, took her to become a Huntress, but after her family abuses her by discovering her weapons, she kills them all, Rhodes included. When Cinder wakes up, Salem sends his followers to invade Atlas by using the Grimm River to break through his shields. While Cinder is ordered to find Watts and Penny, Oscar plans to work within Salem's group to sabotage them.

Each episode explains details of a particular topic and is narrated by a character from the show. The first four World of Remnant episodes were released alongside Volume 2, narrated by Jen Taylor, the mysterious narrator in Volume 1's first episode, who later turned out to be the primary antagonist in the series, Salem. The four episodes released together Volume 3 were narrated by Shannon McCormick, the voice of Professor Ozpin. The eight episodes released together with Volume 4 were narrated by Vic Mignogna, who voiced Qrow Branwen prior to the conclusion of Volume 6. Season 1 No.overallIng. inseasonTitleLengthOriginal air dateWR11Dust2:17August 21, 2014 (2014-08-21) The narrator explains Dust as four basic forms of a naturally occurring energy propellant, triggered by Aura of humans and Faunus. It can be combined naturally or artificially to form stronger types that Humanity utilized for technology such as airships or androids. Only skilled and disciplined people can use its raw form without losing control, so the most common use of dust is in ammunition - though some still use archaic means, like weaving it in clothing or their own bodies. While humanity is part of everyday life, it has no how it came to be - or how humanity's involvement with will change Remnant. WR22Kingdoms1:57September 18, 2014 (2014-09-18) The narrator describes Remnant as a dangerous place for humanity, as many civilizations have grown and fallen over the years. Today, there are only four left. Atlas in the northern continent and Mistral in the east, while Vacuo and Vale share the largest continent. Protected by natural barriers and human persistence, each kingdom has a governing council and their own individual military - some mandatory, some not. Outside the walls of the kingdom, nomadic tribes and small villages roam, but most fall to Grimm attacks. Each kingdom has a Huntsmen academy to train the next generations of hunters to protect humanity from Grimm. Described as beacons of hope and safe havens, the narrator claims they are the key to humanity's survival - as long as they stand together. WR33Grimm3:36October 16, 2014 (2014-10-16) The narrator describes Grimm's creatures as a destructive force that has existed through most of Remnant through known history. Once believed to be evil spirits, further study showed that they continued to evolve and diversify over time as animals. They attack people and their creations first and foremost, only in conflict with wildlife for territory. Common belief is that Grimm does not need to feed; they choose to. They are attracted to negative emotions - with numbers proportional to how far panic spreads. Trapped Grimm usually break free or die quickly and their bodies evaporate shortly after their deaths, making the investigation difficult. The narrator concludes that Grimm is not thoughtless; while younger are more ruthless, older people learn from their experiences to be more cautious in the future – a natural adaptation that makes them more effective killers. WR44Aura2.00December 9, 2014 (2014-12-09) (DVD/Blu-ray) The narrator explains that Hunters are widely considered Remnant's greatest warriors by mastering Aura; a manifestation of the life force or soul that runs through every living being — red Grimm — but which only true warriors can amplify and control. It is used primarily for defense, cladding welder in a protective force field to help survive otherwise fatal blows - although their reserves break down with each hit until exhausted, leaving them vulnerable. Aura's other main use is by projecting it into a more tangible form known as a hint that gives a special power unique to each wielder such as superhuman strength or telekinesis. The narrator argues that with enough education and focus, Aura can turn a warrior into far more than a simple man or woman. [Note: This episode was a DVD/Blu-Ray exclusive.] Season 2 No.overallIng. inseasonTitleLengthOriginal air dateWR51Vytal Festival Tournament2:40October 8, 2015 (2015-10-08) Professor Ozpin explains how the perennial Great War ended when humanity's leaders made peace on the island of Vytal, forming new laws, traditions and Academies to create modern society. Among these is Vytal Festival Festival Celebrate peacetime every two years, rotating between each kingdom to ensure their cultures remain open to the world. Vytal Festival's Tournament, a final stone of the event, was designed to test the strength of the kingdom's Huntsman in a safe and friendly environment, the competition ensures every warrior strives to be their best. As the tournament's lists grew, the four kingdoms of Amity created the Colosseum; a mobile arena that can visit any kingdom in Remnant. Ozpin notes his hope for the established peace to continue and help humanity grow closer. WR62Huntsmen2:36November 21, 2015 (2015-11-21) Ozpin describes The Huntsmen and Huntresses as the best warriors in Remnant, often outperforming the kingdom of police and military in terms of skill, but with only one goal; fight Grimm. Each kingdom established an academy after the Great War: Beacon Academy in Vale, Haven Academy in Mistral, Shade Academy in Vacuo and Atlas Academy in Atlas (originally Mantle). They recruit the most promising primary school graduates and group them into teams of four to develop communication, empathy and teamwork skills. Students are separated from the kingdom's allegiance while they are in the academy, and after graduation they choose their work and employers, usually through mission boards; kingdom is of its choice. But Atlas Academy is an exception, scrutinized for indoctrinating a military lifestyle on its students, pushing recruiting into the military's Special Units after graduation. Ozpin states that regardless of teaching method, the end result is the same: Hunters and Huntresses, ready to make their own paths. Some stay in a team, others work alone - all are expected to protect and serve humanity, never succumb to darkness. WR73Cross Continental Transmit System3:07December 26, 2015 (2015-12-26) Ozpin describes the history of the Cross Continental Transmit System (CCTS), before which kingdoms could only communicate within their borders via radio or across borders with physical messages, the latter of which was always threatened by Grimm. It was impractical to establish relay satellites because spaceflight was impossible when known dust types lost their forces outside of Remnant's atmosphere, so Atlas instead developed a series of four tower-house wireless signal hubs - one in each kingdom. While an online web and communication available via handheld rollers, connectivity suffers the additional one is from a kingdom, with attempts at smaller support towers suffering from Grimm attacks. Despite the benefits of global communication, Ozpin notes the system's fatal flaw is that losing even one of the towers will take down the entire network, describing it a poetic irony that Remnant's people should either speak as one or not speak at all. WR84The Four Maidens7:02January 23, 2016 (2016-01-23) Ozpin tells the story of the four virgins; An old wizard who lives in the woods sees a virgin, Winter, waiting outside in the snow for her sisters, falling from the serenity she brings. When he wakes up, he sees another virgin, Spring, also waiting for her sisters and planting seeds to create a beautiful garden. The guide watches until he hears laughter from a third waiting virgin, Summer, who convinces the guide to step outside and embrace the world. They prepare a party together, just as the fourth sister, Fall, arrives and asks the guide's name when he invites her. The guide claims that he is uninteresting and has nothing to his name despite centuries of life, but Fall comments otherwise and convinces him that he has everything he needs in life. The guide asks why they helped him with his loneliness, with Fall's answer being that they would do it for anyone. By reciprocating their kindness, the guide gives the sisters their magic and gives them control over the elements of nature. The sisters promise to use their gifts to help others and visit their friend every year. [Note: An abbreviated version of the tale of the four virgins was also told by Pyrrha Nikos (Vol. 3, Ch. 6)] Season 3 No.overallIng. inseasonTitleLengthOriginal air dateWR91Vale2:23October 17, 2016 (2016-10-17) Qrow introduces Remnant; a world where cities are constantly rising and falling towards Grimm. Currently, Faunus has race island continent Menagerie, while the four kingdoms - Vale, Mistral, Atlas, Vacuo - are the sweet spots to live in. Vale, located on the northeastern end of the largest continent of Sanus, is a kingdom protected by two natural barriers - mountains in the east and shallow waters on the northwest coast, making it very safe. The kingdom consists of Vale - its namesake capital - along with a few smaller towns along the northwest coast. There is also the small island of Patch, off the coast opposite the capital, which Qrow claims a nice place to raise a family - as Ruby and Yang were. Attempts to extend the kingdom past the mountains, such as the Mountain Glenn project, have been colossal failures. Qrow states Vale is not half bad, as regular climate, natural barriers and severe border defences allow citizens to live their lives instead of fighting for survival, even though the Fall of Beacon has now left people worried. WR102Mistral2:20October 18, 2016 (2016-10-18) Qrow tells the land mass east of Sanus as the second largest continent, Remnant, Anima, where the Kingdom of mistral is located. Mistral has the largest area of any kingdom, home to a wide range of ecosystems and lifestyles. Its high society is known for fashion, architecture and theater, while the lower class has its own fame; The largest black market in Remnant, where you can hire thieves, assassins and thugs of any kind. But all the inhabitants of the Mistral have something in common: their respect for nature, especially the sea and the sky. Qrow reports that natural resources had an impact on the history and technology of the Mistral, starting with the first settlers to find shelter in its wind-cut rocks, from where they into the country. A big problem for the government is the kingdom's large size, which allows a lot of outlaws to hide there, while the capital is mostly safe, other cities like Windpath and Kuchinashi are harder to govern. Qrow concludes that there are a lot of places to hide, though you need to know where to look to find certain people. WR113Atlas3:12October 19, 2016 (2016-10-19) Qrow expresses a low opinion of most Atlas citizens. Both the youngest and arguably most successful kingdom, it was originally called Mantle and founded by settlers who for unknown reasons travelled to the northernmost continent, Solitas. The cold climate and the big mountains protected settlers from Grimm - but only if they could adapt, developing advanced technology faster than the rest of Remnant. The Great War gave Mantle another boost, as new forms of Dust application, weapons, research and mining allowed it to expand. The area around the battle school, Alsius, was used to build new facilities. After the Great War, Alsius was renamed Atlas and captured many war veterans using New Dust technologies to improve its grounds and secure the surrounding areas. Eventually, the military, laboratories, research facilities and residential areas also moved to Atlas. As the new city grew from Mantle, the capital was moved there and the kingdom itself was renamed Atlas. Qrow remarks that while some people called it a golden age of prosperity, the people left in Mantle felt it the coldest winter they've ever known. WR124Vacuo2:58October 20, 2016 (2016-10-20) Qrow comments Vacuo may be worse off than Mantle was. Located at the western end of Sanus, it was once a paradise - an oasis in the surrounding desert bursting with natural resources, geographical defense and the world's largest dust deposits. Many nomads definitely had a thriving lifestyle, but their communities became complacent, while the rest of the world had to adapt to survive. Soon, the other kingdoms set their eyes on Vacuo's resources, triggering what would be the Great War. After years of conflict, unlimited mining and ecological disasters, Vacuo was reduced to a barren wasteland: citizens living in temporary homes, often traveling in response to volatile resources or occasional Grimm attacks. While still a kingdom, its formal government goes unnoticed by citizens with Shade Academy considered the only source of order. But its citizens still have mutual respect for each other according to an unspoken rule: If you can survive here, then you are welcome here. Qrow recalls how Ozpin said the four kingdoms represented what humanity is capable of when they work together, lamenting that they wanted Ozpin now to do it. WR135Between Kingdoms3:18November 12, 2016 (2016-11-12†20) Qrow tells how areas between realms are mostly populated by Grimm. Trained Huntsmen and Huntresses Should fine on the roads unless they meet large packages. Small villages and towns also dot the land, inhabited by people who do not want to deal with life in the realms, are dissatisfied with how the realms are governed or simply prefer independence. If a city is founded by smart people, it can survive in the same way the realms do: with natural barriers and strong defenses - otherwise frequent Grimm attacks are likely to destroy them within a year. Another problem is to wander bandits tribes; groups of normally skilled fighters who prey on convoys, tend to attack and loot weaker cities. Attacks by Grimm or bandits are usually simultaneous; if a city survived a bandit attack, the lingering negative emotions can attract Grimm - and conversely, the Raiders will attack cities that Grimm has weakened. Bandits will never stay in one place for long, as Grimm threatens them, too. According to Qrow, almost all of Remnant has been mapped, but there are some areas from which no one has returned alive - places where she (Salem) could possibly be. WR146Faunus4:40November 26, 2016 (2016-11-26†20) A humanoid species known for each having a single animalistic trait - such as cat ears. Exists at least as long as humanity, Faunus is genetically compatible with humans, although such a union will always produce Faunus children. Qrow tells the history of Faunus and people as full of conflict; in ancient times, people were afraid of Faunus and either avoided them, pushed them out of settlements or brutally hunted them, Faunus began to outdo and exploit them - such as turning them into cheap labour - and Faunus saw them as a threat. But when Grimm attacked a village in Sanus, it became a turning point as the two races united to defend their homes against a common enemy. Another milestone was after the Great War; Rest was desperate for compromise, and one of them involved Faunus, who was given equal rights as citizens and received the island's continent menagerie to rule for itself. But Qrow says this was still a bad deal for Faunus; while living all over Remnant, the quality of their treatment varies in different regions, where a lot of Faunus pulls out of the kingdoms to live together at the Menagerie. Conflicts continue as a result, with Faunus now organized into groups - such as the White Fang. WR157Schnee Dust Company4:28December 17, 2016 (2016-12-17†20) Qrow speaks negatively about the current Schnee Dust Company, which now has a monopoly on the extremely valuable and important Dust products in Remnant. Its founder Nikolas Schnee, the son of a Dust miner, was born in Mantle after the end of the Great War, during the kingdom's transformative period, during which it depended on others for Dust resources. Nikolas worked in the mines, went to combat school and studied. After his father's death, Nikolas used his small inheritance to fund an expedition for new Dust Deposits and founded SDC out of his success. Known for quality, affordability, and trust, Nikolas personally oversaw each expedition and expansion, gaining the trust of his men and companies in all kingdoms. But after years of working in dust mines, Nikolas was forced into early retirement, mainly due to health issues. A man named Jacques Gelé then married Nikolas' daughter, took on the Schnee name and convinced Nikolas that he was the right successor. Jacques is a cunning businessman whose leadership made the SDC more profitable than ever, dominating the industry - but with many dubious methods: cheap labor, dangerous working conditions, destroying competition and corporate propaganda. In Qrow's view, Jacques only cares about winning - and with him in charge, the future of the once-good Schnee name is uncertain. WR168The Great War7:20January 14, 2017 (2017-01-14†20) The Great War lasted about ten years, followed by a century of tensions. Mistral had conquered Anima and made an alliance with Mantle, exchanging supplies and technology. An incident in Mantle led to a decree that abolished art and suppressed self-expression, trying to control citizens' emotions to reduce the Grimm attack, which Mistral partially observed when Mantle tried to enforce the decree in other realms. This and other issues, such as Mistral and Mantle's treatment of citizens or the maintenance of slavery, caused conflicts with Vale citizens, resulting in a clash when Mistral tried to expand to the east coast of Sanus. The King of Vale avoided conflict, but the warring settlers did not, triggering the first battle of the Great War. Mantle supported mistral, with fights starting in both Anima and Sanus. Grimm attacked all combatants, sometimes forcing the truce between people to deal with monsters. Vacuo initially remained neutral until Mantle and Mistral tried to force their cooperation, instead of supporting Vale in fear of the other side's victory. The war ended with the Vacuo campaign, Mistral and Mantle trying to claim Vacuo's Dust mines and cut off supplies to their enemies. The King of Vale led his and Vacuo's forces, and armed with crown, sword, and scepter, he decimated the enemy army. The deadliest battle of the war cost many lives and created the legend of the Warrior King. In the end, everyone bowed to the King of Vale, who refused to rule over The Remnant and established the Vytal Treaty instead; territories were redistributed, slavery was abolished and governments were restructured. The last King of Vale founded huntsmen academies and gave his most trusted followers command of them, promising to teach humanity how to fight on the condition that it was not against each other; A bargain Qrow says humanity has not honored.
